

Formulary Navigator™

Industry-leading provider of pharmacy and medical drug list management trusted by more than 70 organizations.

MMIT Navigator is the leading formulary management and publishing solution, enabling pharmacy teams to simplify drug benefit management and communicate that coverage clearly to providers and patients.

The workflow tool used by the largest health systems and PBMs in the US market.

Streamline Pharmacy Operations

Reduce Manual Processes

Satisfy Compliance Requirements

"We've grown substantially this year and now manage a third more formularies than we did in prior years. Thanks to Navigator, we have been able to do this without increasing Pharmacy Operations staff."

Director, Pharmacy Operations

"By leveraging Formulary Navigator's accessibility and language functionality, we were able to save around \$250k in annual remediation costs."

VP, Pharmacy Operations

Formulary Navigator Suite of Offerings

Formulary Management

- Streamline formulary management via automated compliant workflows.
- Access robust transaction history to support government audits.
- Manage separate drug lists and automatically combine with core formularies.

Medical Drug Lists

- Build and manage medical drug lists and stay current with drug compendiums.
- Publish medical drug list documents and websites to internal and external stakeholders.

Submission and Publishing

- Create submission-ready regulatory files automatically.
- Adhere to state and federal publishing guidelines.
- Meet internal brand standards through highly configurable templates.

Searchable Formulary Websites

- Generate websites for providers, members, call centers, internal teams and more!
- Meet internal brand standards and regulatory requirements through highly configurable, dynamic templates.

Smoothing and Simplifying Access to Therapy

We partner with your Pharmacy Operations team to understand your business-specific operations and infuse industry-leading practices to help your organization realize the full value of Formulary Navigator.
