

RC Claim Assist

Accurate Billing Made Easy for Medical Drug Claims

RC Claim Assist provides an educational tool, with the functionality that prescribers need, to avoid the incorrect submission of claims. RC Claim Assist gives your prescribers an intuitive and fast method to correctly code for medical

benefit pharmacy claims. This tool will help navigate the complexity of medical drug claim submission and eliminate confusion when billing for medically covered drugs.

Ensure providers use correct NDCs to crosswalk to HCPCS/CPT® per payer NDC mandates.

Accurately account for product wastage.

Convert HCPCS/CPT® drug code units to NDC drug code units easily.

Ability to customize based on look and feel of brand websites.

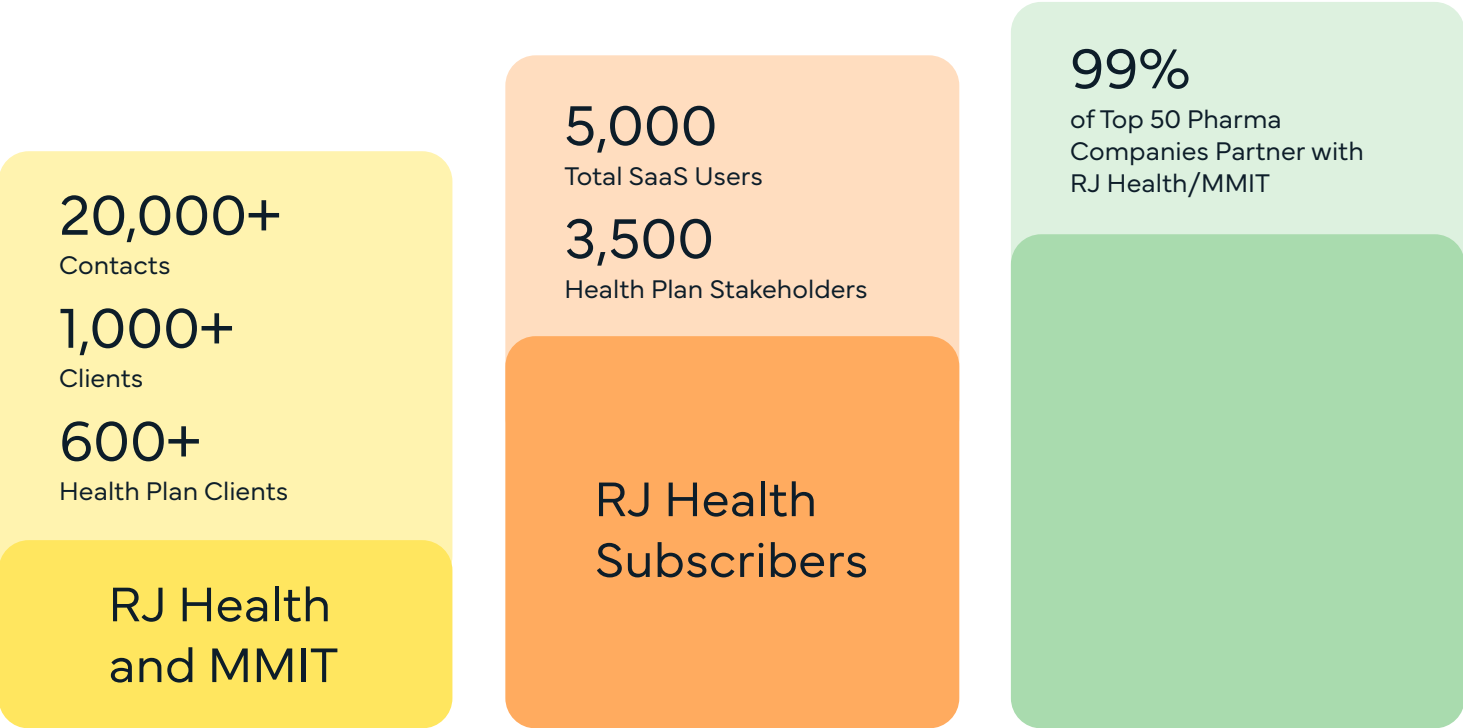

Avoid dosing/coding unit mismatches.

Provides feedback if provider is billing Code Units below Min or above Max Dosing Range.

RC Claim Assist Will Help...

- 1. Smooth access to medical therapies by reducing the chance providers are abandoning drugs due to billing issues.
- 2. Streamline the claims process.
- 3. Ensure expeditious claim payment by avoiding common coding errors that may lead to incorrect reimbursement and denials.
