

MMIT Analytics

Solution Overview

MMIT Analytics delivers comprehensive formulary, medical policy and restriction information straight to your team with **easy-to-use technology**.

Overview

MMIT's industry-leading platform, **Analytics**, empowers teams with instant coverage views and access data for various brands and therapeutic areas. This tool provides a simplified way to determine patient access, gain a full picture of payer decision-making and evaluate historical drug coverage trends.

Use MMIT Analytics to:

- Predict payer and PBM responses to new drug launches through market access analytics.
- Analyze pharmacy and medical benefit landscapes using payer and PBM data analytics.
- Anticipate shifts in market share by analyzing historical trends.
- Validate changes in payer policies and understand the impact to a brand's market position.

View Changes in Market Access

→ Compare month over month access relative to coverage, ST, and PA.

→ Drill down to why change was made (Status, Plan Removal, Lives Shift).

→ Validate changes with payer source documentation.

“Throughout my 10 years in market access, I’ve been exposed to most of the top solutions, at times simultaneously. I’ve always **found myself turning to MMIT because of their products’ ease of use and data integrity.**”

Jai Persico, National Account Executive
Neurocrine Biosciences
