

NorstellaLinQ

Unparalleled data. Unmatched expertise.

Understanding patients—who they are, where they are, and what they need—is at the core of our mission. By getting closer to the patient, we can move more confidently and swiftly to get life-saving therapies to market faster.

How it works

NorstellaLinQ distills decades of industry-leading proprietary data from Evaluate, Citeline and MMIT. As the largest collection of patient data, it is used to create a comprehensive, longitudinal view of the patient. This data is fused with machine learning and AI trained on the decisions and actions of hundreds of MDs, epidemiologists, PhDs, pharmacists, technologists and data scientists.

Proprietary data

CITELINE

Business intelligence

Address complex commercial, clinical and regulatory challenges with the most comprehensive trial, investigator and regulatory data.

199K+ Sites in 185 countries

Data on 100K+ drugs
